About Rhythm

Rhythm is a modern, open-source music player for Android built with **Material 3 Expressive** design and powered by Media3 ExoPlayer 1.9.2. Now at **v4.2**, Rhythm delivers professional-grade audio with Bit Perfect playback, EAC3-JOC/Dolby Atmos via FFmpeg, a refined expressive UI, multi-select batch library actions, and complete privacy.

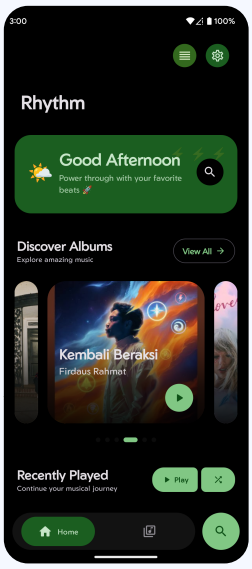

Key Features

- **Material You** - Dynamic theming with wallpaper colors (Android 12+)
- **Professional Audio** - Media3 ExoPlayer with gapless playback, Bit Perfect mode & EAC3-JOC support
- **Synced Lyrics** - LRCLib integration with word-by-word highlighting
- **10-Band EQ** - Professional equalizer with 6032+ AutoEQ device presets
- **Playback Stats** - Comprehensive listening statistics and insights
- **Modern Widgets** - Multiple responsive layouts with Material 3 design
- **Format Support** - FLAC, ALAC, MP3, AAC, EAC3-JOC, Opus, WAV, OGG, and more
- **Multi-Select** - Batch operations across songs, albums, and playlists
- **Expressive UI** - Refined adaptive shapes, components & Material 3 Expressive design
- **Privacy First** - 100% FOSS, no tracking, offline-capable

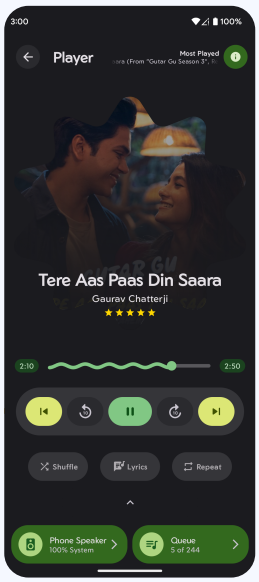

System Requirements: Android 8.0+ (API 26) • 2GB RAM • 50MB Storage

Installation Options

- **F-Droid** - Official F-Droid repository (full features)
- **IzzyOnDroid** - F-Droid repository for privacy-focused users (full features)
- **GitHub Releases** - Direct APK download (full features)
- **Obtainium** - Auto-updates from GitHub (full features)
- **Google Play Store** - *Coming soon!* (policy-compliant version)

> **Note:** F-Droid, IzzyOnDroid, and GitHub releases include all features including Deezer & YouTube Music artwork, LRCLib lyrics, and YouTube Music search. See Build Variants for details.

Detailed installation guide: See the Installation Wiki

📖 Documentation

Complete documentation is available in our **Wiki**:

- **Getting Started** - First-time setup and basic usage
- **Installation Guide** - Detailed installation instructions
- **Audio Formats** - Supported formats and conversion guide
- **Permissions Guide** - Understanding app permissions
- **Troubleshooting** - Common issues and solutions

Technology Stack

Category	Technology
UI Framework	Jetpack Compose + Material 3 + Glance Widgets
Audio Engine	Media3 ExoPlayer 1.9.2 + FFmpeg Decoder + Bit Perfect
Build System	AGP 8.13.2 + Kotlin 2.3.10
Database	Room + SQLite
Networking	Retrofit + OkHttp + Ktor
Image Processing	Coil + AndroidX Palette
Audio Metadata	JAudioTagger
Async Programming	Kotlin Coroutines + Flow
Work Management	WorkManager
Permissions	Accompanist Permissions
Navigation	AndroidX Navigation
JSON Processing	Gson
Memory Management	LeakCanary (debug) + Desugar JDK Libs
Typography	Geom Font + Material Icons Extended
Language	100% Kotlin
Architecture	MVVM + Clean Architecture
